

Another **NEW** product from the makers of
Relief Pak® cold & hot packs

- Instantly activated
- Reusable
- Economical
- Safe when wet
- Long-lasting heat

Snap!

Use!

Recharge!

Once the metal disk in a Hot Button™ compress is snapped, the liquid in the pad crystallizes and becomes hot right before your eyes! The Hot Button™ compress generates heat for 30 minutes to 2 hours depending on the pad's size and the outside temperature. To recharge the compress, boil it for approximately 10 minutes. The activation and recharging of a pad can be repeated at least 100 times.
