

# Chattanooga® Intellect® LEGEND XT™ Therapy Systems

## Intellect® LEGEND XT™ Therapy Systems

Electronic "platform" is capable of providing multiple modalities in one therapy station. You can start simple (stim and ultrasound) and add modalities (additional stim, laser, battery module and patient management software).

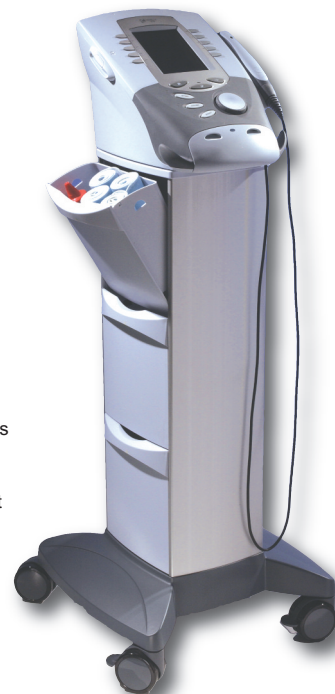

- stim unit offers 6 clinical waveforms including: interferential, Russian, bi-phasic, high volt, microcurrent and premodulated
- ultrasound delivers 1 and 3.3 MHz through a 5cm<sup>2</sup> applicator. Multiple waveforms available in combination mode
- built-in patient data card device can record patient modality and pain profile information
- user-defined protocols customize any waveform to your specific need
- optional mobile cart has 6 storage bins to minimize cord and cable hassle

- each unit ships with 5 Patient Data Cards, 4 each 3" inch diameter carbon electrodes (2 red, 2 black), 4 each Dura-Stick® II 2 3/4" diameter electrodes and 1 2 1/2" x 24" Nylatex® wrap
