

CanDo® Multi-Axial platform system

Multi-Axial Platform System offers adjustable ROM (range-of-motion) and weight training to maximize lower body rehabilitation. Includes reversible board (1 side for left foot and 1 side for right foot). 5-ball set (color-coded yellow, red, green, blue and black from easiest to most challenging). Balls screw into board to provide vestibular challenge. Comes standard with 2 weight rods, 10 lbs of weight plates and a wall rack. Optional motion limiter is used to limit ROM.

professional system can be hung on the wall for easy storage!

instability balls can be used for both Multi-Axial Platform System and MVP® systems

Professional System (pictured above)

- A two-sided professional Multi-Axial board
- B weight rack with five color-coded instability balls: yellow, red, green, blue and black
- C 2.5 lb weight plates (4 each)
- D motion limiter complete with clips and padding
- E weight rod (fits any of the five sockets on either side of board)
